## **DETAILED ACTION**

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: “a fresh air concentration value” in claim 1 does not have antecedent basis in the specification.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 29-43 are rejected under 35 U.S.C. 102(b) as being anticipated by Koenig (USPN 5,176,631). Koenig discloses a sensor, a memory, a processor a display and an alarm. See 3:32-38,52-53; 4:36-40,49,63-68; 5:34-42,47-49,58-62; 6:7-11; 46:30-33,36-42,58-62,67-68 and 47:1-2. The processor is considered capable of functioning as claimed.

The means for receiving and triggering is not considered to be a means plus function recitation since structure defining the means follows in the claim. It is assumed applicant has not invoked 112 6<sup>th</sup> paragraph.
